PROFILE

Technical Product Manager with experience driving products from problem definition to production across telecom operations, education, and consumer applications. Led product definition for IOP, a role-based ticket escalation system that unified workflows across four siloed teams, and took TATY, a site documentation workflow, from PRD to launch. Experienced in PRD development, phased execution planning, and MVP delivery.

EXPERIENCE

2026/02 – Present
Lagos, Nigeria

Technical Product Manager

Infratel Africa

Infratel Operations Platform (IOP)

- Led product definition for IOP, consolidating four siloed teams (NOC, Field, Core and Performance) into a single role-based ticket escalation system.
- Mapped fault-management workflows across five user roles and defined escalation paths, handoff triggers and closure criteria.
- Defined requirements for seven role-specific dashboards plus a cross-functional performance dashboard covering ticket lifecycle, team performance and site-level metrics, giving leadership cross-team operational visibility for the first time.

TATY

- Delivered TATY, a site documentation workflow and operational-records system for three user groups (Network Rollout, Product and Management), from PRD to live production deployment.
- Acted as both product owner and hands-on builder.

EDUCATION

2021/03 – 2025/08
Osun, Nigeria

Bachelor of Engineering, Electrical and Electronics Engineering

Oduduwa University

Second Class Honors (Upper Division)

SKILLS

Product

- PRD development
- Roadmapping and prioritization
- Agile and sprint planning
- Rapid prototyping and MVP delivery

Tools

- Supabase, Vercel, v0
- Git and GitHub
- Jira, Slack and Notion
- Microsoft Office and Google Workspace

PROJECTS

2026/03

CorperCompass

TechCrush Capstone Project · Product Manager

A digital relocation guide for NYSC members moving to new states in Nigeria. I led product definition and authored the full PRD, covering problem framing, feature scope, and functional and non-functional requirements across four relocation phases, and built a phased execution plan from research to launch, delivered within a fixed program timeline.

2026/07

Kawe

YPIT AF hackathon MVP · Product Manager

Kawe is an interactive study companion where students upload multimodal learning materials, ask questions directly from them, and practice with quizzes and flashcards. It also supports collaborative study, so course mates and peers can learn together and share sources. The MVP was shipped in seven days on a shared retrieval-augmented generation (RAG) architecture serving three user contexts.
